

DEUTSCHES INSTITUT FÜR BAUTECHNIK

Corporate image

We support safe and innovative building.

We are the competent partner for questions concerning products and types of construction in the field of structural engineering and building law. We are the approval body in the field of construction for Germany and Europe.

In performing our tasks sound advice, speedy processing, transparency and results respected by the experts are important to us.

In close contact with science and technology we permanently update our knowledge and use it together with our experience for the benefit of our customers from economy and administration. Our approvals provide for a wide acceptance of the products in the market.
