Deutsches Institut für Bautechnik

Approval body for construction products and types of construction

Bautechnisches Prüfamt

An institution established by the Federal and Laender Governments

Member of EOTA
www.eota.eu

Designated according to Article 29 of Regulation (EU) No 305/2011 and member of EOTA (European Organisation for Technical Assessment)

# European Technical Assessment

# ETA-14/0336 of 31 October 2014

## General Part

| | |
|---|---|
| Technical Assessment Body issuing the European Technical Assessment: | Deutsches Institut für Bautechnik |
| Trade name of the construction product | Hollow block frame plug HBR 10 |
| Product family to which the construction product belongs | Plastic anchor d=10mm for multiple use in masonry for non-structural applications |
| Manufacturer | Apolo MEA Befestigungssysteme GmbH<br>Industriestraße 6<br>86551 Aichach<br>DEUTSCHLAND |
| Manufacturing plant | Werk I |
| This European Technical Assessment contains | 15 pages including 11 annexes which form an integral part of this assessment |
| This European Technical Assessment is issued in accordance with Regulation (EU) No 305/2011, on the basis of | Guideline for European technical approval of "Plastic anchors for multiple use in concrete and masonry for non-structural applications" ETAG 020, Edition March 2012, used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011. |

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission according to Article 25 Paragraph 3 of Regulation (EU) No 305/2011.

## Specific Part

### Technical description of the product

**1** The hollow block frame plug HBR 10 is a plastic anchor consisting of a plastic sleeve made of polyamide and an accompanying specific screw of galvanised steel or stainless steel

The plastic sleeve is expanded by screwing in the specific screw which presses the sleeve against the wall of the drilled hole.

The product description is given in Annex A.

### 2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchors of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

#### 3.2 Safety in case of fire (BWR 2)

| Essential characteristic | Performance |
|---|---|
| Reaction to fire | Anchorages satisfy requirements for Class A1 |
| Resistance to fire | No performance determined (NPD) |

#### 3.3 Hygiene, health and the environment (BWR 3)

Not applicable

#### 3.4 Safety and accessibility (BWR 4)

| Essential characteristic | Performance |
|---|---|
| Characteristic resistance for tension and shear loads | See Annex C 1 and C 2 |
| Characteristic resistance for bending moments | See Annex C 1 |
| Displacements under tension and shear loads | See Annex C 3 |
| Anchor distances and dimensions of members | See Annex B 2 and B 3 |

### 3.5 Protection against noise (BWR 5)

Not applicable

### 3.6 Energy economy and heat retention (BWR 6)

Not applicable

### 3.7 Sustainable use of natural resources (BWR 7)

The sustainable use of natural resources was not investigated.

### 3.8 General aspects

The verification of durability is part of testing the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

## 4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

According to Decision 97/463/EC of the Commission of 27 June 1997 (Official Journal of the European Communities L 198 of 25.07.1997, p. 31–32) the system of assessment and verification of constancy of performance (AVCP) (see Annex V and Article 65 Paragraph 2 to Regulation (EU) No 305/2011) given in the following table applies.

| Product | Intended use | Level or class | System |
|---|---|---|---|
| Plastic anchors for use in concrete and masonry | For use in systems, such as façade systems, for fixing or supporting elements which contribute to the stability of the systems | — | 2+ |

## 5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at Deutsches Institut für Bautechnik.

Issued in Berlin on 12 November 2014 by Deutsches Institut für Bautechnik

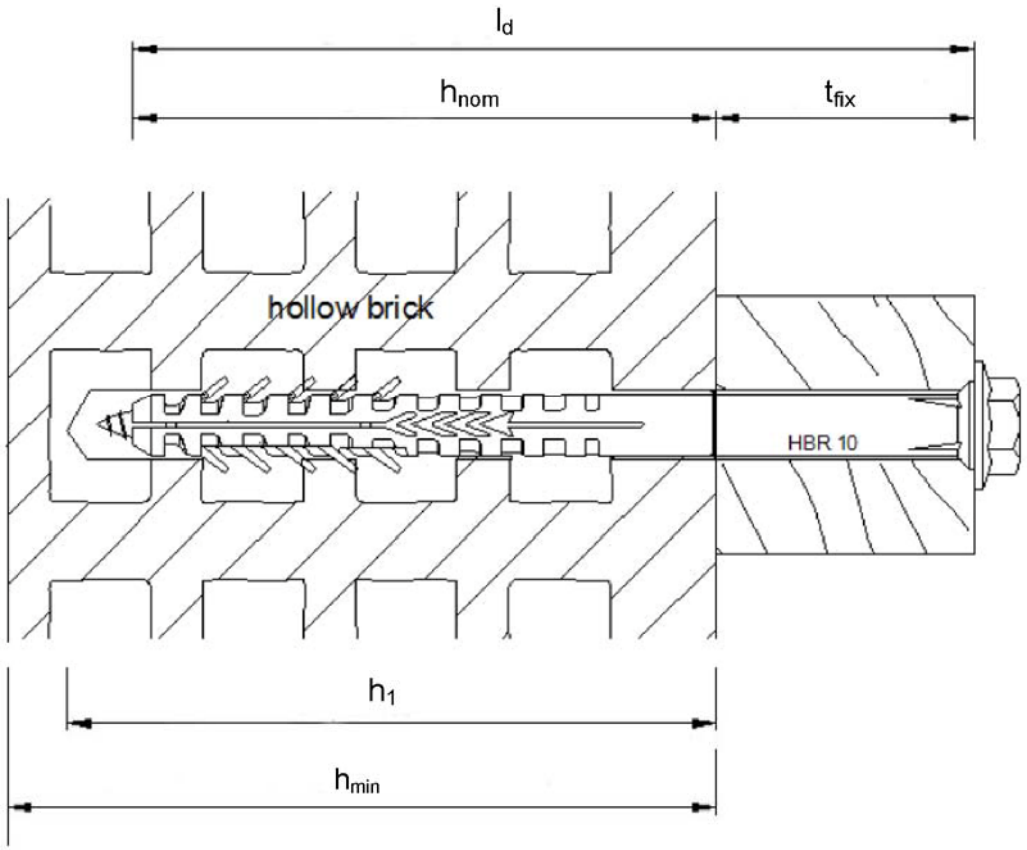
## Installed condition



| | | |
|---|---|---|
| $h_{nom}$ | = | overall plastic anchor embedment depth in the base material |
| $h_1$ | = | depth of drilled hole to deepest point |
| $h_{min}$ | = | minimum thickness of member |
| $t_{fix}$ | = | thickness of fixture |
| $l_d$ | = | length of plug |

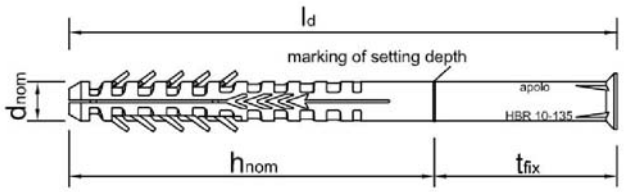
| | |
|---|---|
| **Hollow block frame plug HBR 10** | **Annex A 1** |
| **Product description**<br>Installed condition | |

Deutsches Institut für Bautechnik DIBt

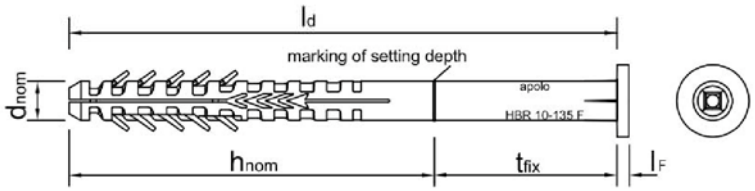
## Product description

### Anchor sleeve HBR 10

Sleeve with countersunk head (S) or with flathead (F)



HBR 10 Type S

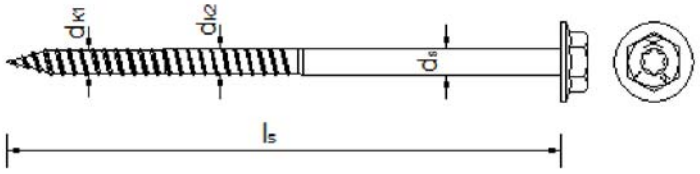


HBR 10 Type F

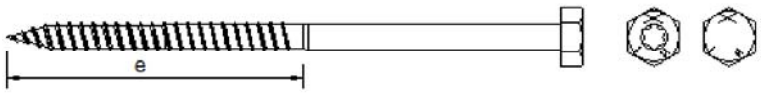
| **Marking:** | Brand | Type | diameter ($d_{nom}$) - length ($l_d$) |
|---|---|---|---|
| **Example:** | **apolo (or logo)** | **HBR** | **10 - 135** |

### Special screw

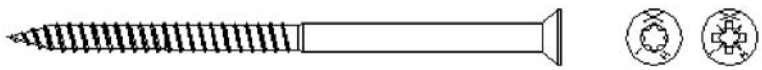
Screw head with different tool fittings



Type SSKS



Type SSK



Type TX or PZ

| **Marking:** | Brand | steel grade | Code No screw length | manufacturer code |
|---|---|---|---|---|
| **Example:** | **X** | **6.8** | **14** | **1** |

**Hollow block frame plug HBR 10**

**Product description**
Anchor types, specification screws

**Annex A 2**

## Table A1: Dimensions [mm]

| Anchor sleeve | | | | | |
|---|---|---|---|---|---|
| | $l_d$ | Ø $d_{nom}$ | $t_{fix}$ min | $t_{fix}$ max | $h_{nom}$ |
| **HBR 10** | ≥90 | 10 | ≥ 1 | 1000 | 90 |

| Special screw | | | | | |
|---|---|---|---|---|---|
| | $l_s$ 1) | Ø $d_s$ | Ø $d_{k1}$ 2) | Ø $d_{k2}$ 2) | e |
| **HBR 10** | ≥95 | 7 | 5,8 | 6,3 | 75 |

1) To ensure, that the screw penetrates the anchor sleeve, $l_s$ must be min. $l_d + l_F + 5$ mm

2) Ø $d_{k1}$ and Ø $d_{k2}$ are core diameters of the thread

## Table A2: Materials

| Designation | Material |
|---|---|
| **anchor sleeve** | Polyamid PA 6 |
| **special screw (steel, zinc plated)** | Steel, galvanised ≥ 5 µm acc. EN ISO 4042:2011-01<br>$f_{uk}$ ≥ 600 N/mm², $f_{yk}$ ≥ 480 N/mm² (≥ 6.8 screw) |
| **special screw (stainless steel)** | Stainless steel A4, material 1.4401 or 1.4571<br>$f_{uk}$ ≥ 700 N/mm², $f_{yk}$ ≥ 350 N/mm² |

## Specifications of intended use

**Anchorages subject to:**
- Static and quasi-static loads
- Multiple fixing of non-structural applications

**Base materials:**
- Solid brick masonry (use category b), according to Annex C1.
  Note: The characteristic resistance is also valid for larger brick sizes and higher compressive strength of the masonry unit.
- Hollow brick masonry (use category c), according to Annex C2.
- Mortar strength class of the masonry ≥ M2,5 according to EN 998-2:2010.
- For other base materials of the use categories b and c the characteristic resistance of the anchor may be determined by job site tests according to ETAG 020, Annex B Edition March 2012.

**Temperature Range:**
- a) -40 °C to +40 °C (max. long term temperature +24 °C, max. short term temperature +40 °C).
- b) -40 °C to +80 °C (max. long term temperature +50 °C, max. short term temperature +80 °C).

**Use conditions (Environmental conditions):**
- Structures subject to dry internal conditions (zinc coated steel, stainless steel).
- The specific screw made of galvanised steel also be used in structures subject to external atmospheric exposure, if the area of the head of the screw is protected against moisture and driving rain after mounting of the fixing unit in this way, that intrusion of moisture into the anchor shaft is prevented. Therefore there shall be an external cladding or a ventilated rainscreen mounted in front of the head of the screw and the head of the screw itself shall be coated with a soft plastic, permanently elastic bitumen-oil-combination coating (e. g. undercoating or body cavity protection for cars).
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel).

  Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used).

**Design:**
- The anchorages are designed in accordance with the ETAG 020, Annex C Edition March 2012 under the responsibility of an engineer experienced in anchorages and masonry work.
- Verifiable calculation notes and drawings shall be prepared taking account of the loads to be anchored, the nature and strength of the base materials and the dimensions of the anchorage members as well as of the relevant tolerances. The position of the anchor is indicated on the design drawings.
- Fasteners are only to be used for multiple use for non-structural application, according to ETAG 020 Edition March 2012.

**Installation:**
- Hole drilling by the drill modes according to Annex C1 and C2.
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- Installation temperature from -10 °C to +40 °C.
- Exposure to UV due to solar radiation of the anchor not protected ≤ 6 weeks.

## Table B1: Installation parameters

| Anchor type | | | HBR 10 |
|---|---|---|---|
| Drill hole diameter | $d_0$ = | [mm] | 10 |
| Cutting diameter of drill bit | $d_{cut} \leq$ | [mm] | 10,45 |
| Depth of drill hole to the deepest point [1)] | $h_1 \geq$ | [mm] | 100 |
| Overall plastic anchor embedment depth in the base material [1), 2)] | $h_{nom} \geq$ | [mm] | 90 |
| Diameter of clearence hole in the fixture | $d_f \leq$ | [mm] | 10,5 |

1) see Annex A1

2) For hollow and perforated masonry the influence of $h_{nom}$ > 90 mm has to be detected by job site tests

## Table B2: Minimum thickness of member, edge distance and spacing in solid masonry

| Base material | Minimum thickness of member | Minimum edge distance | Minimum spacing | | |
|---|---|---|---|---|---|
| | | | | Anchor Group | |
| | | | | perpendicular to free edge | parallel to free edge |
| | $h_{min}$ [mm] | $c_{min}$ [mm] | $a_{min}$ [mm] | $s_{1,min}$ [mm] | $s_{2,min}$ [mm] |
| Sand-lime solid brick **KS 12-1,8 3DF** | 175 | 100 | 250 | 200 | 400 |

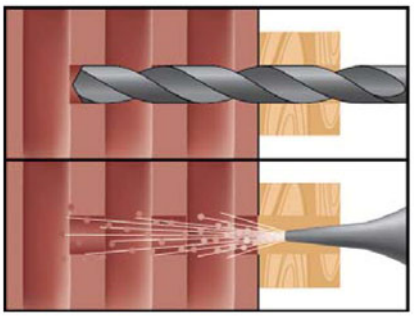
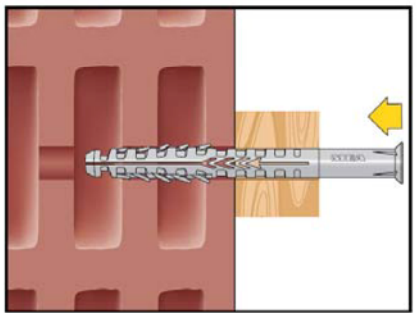
## Installation instructions

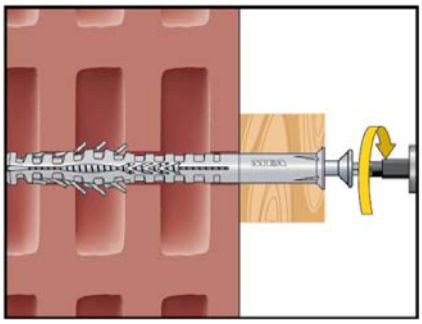


Make the drill hole (can be drilled also through the fixing part).

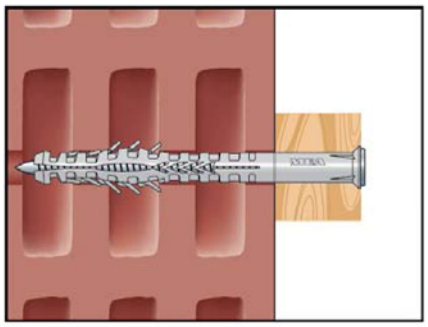
Clean the hole.



Put the plug completely into the hole. The plug must be long enough that the setting depth is ensured.



Turn in the special screw with a screwdriver to fix the fixing part.



The plug is mounted correctly when the screw is completely in the plug.
