## European Technical Assessment

## ETA-15/0373 of 30 September 2016

English translation prepared by DIBt - Original version in German language

#### **General Part**

Technical Assessment Body issuing the Deutsches Institut für Bautechnik **European Technical Assessment:** Trade name of the construction product Fixplug 8 and Fixplug 10 Product family Nailed-in plastic anchor for fixing of external thermal to which the construction product belongs insulation composite systems with rendering in concrete and masonry Manufacturer Klimas Sp. z o.o. Kuznica Kiedrzynska ul. Wincentego Witosa 135/137 42-233 MYKANÓW POLEN Manufacturing plant Klimas Sp. z o.o. This European Technical Assessment 12 pages including 3 annexes which form an integral part contains of this assessment This European Technical Assessment is Guideline for European technical approval of "Plastic issued in accordance with Regulation (EU) anchors for fixing of external thermal insulation composite No 305/2011, on the basis of systems with rendering", ETAG 014, edition February 2011, used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011.

## **European Technical Assessment** ETA-15/0373

Page 2 of 12 | 30 September 2016

English translation prepared by DIBt

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

Page 3 of 12 | 30 September 2016

#### Specific part

#### 1 Technical description of the product

The nailed-in anchor Fixplug consists of an anchor sleeve with an enlarged shaft, spreading zone subsequently, an insulation plate made of polyethylene and an accompanying specific nail of glass fibre reinforced polyamide. The serrated expanding part of the anchor sleeve is slotted. An illustration and the description of the product are given in Annex A.

## 2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 25 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

#### 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

#### 3.2 Hygiene, health and the environment (BWR 3)

Regarding dangerous substances there may be requirements (e.g. transposed European legislation and national laws, regulations and administrative provisions) applicable to the products falling within the scope of this European Technical Assessment. In order to meet the provisions of Regulation (EU) No 305/2011, these requirements need also to be complied with, when and where they apply.

#### 3.3 Safety in use (BWR 4)

Essential characteristic	Performance
Characteristic tension resistance	See Annex C 1
Edge distances and spacing	See Annex B 2
Point thermal transmittance	See Annex C 2
Plate stiffness	See Annex C 2
Displacements	See Annex C 2

## **European Technical Assessment**

## ETA-15/0373

#### Page 4 of 12 | 30 September 2016

English translation prepared by DIBt

## 3.4 Sustainable use of natural resources (BWR 7)

For the sustainable use of natural resources no performance was determined for this product.

## 4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with guideline for European technical approval ETAG 014, February 2011 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: 97/463/EC.

The system to be applied is: 2+

# 5 Technical details necessary for the implementation of the AVCP system, as provided in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at Deutsches Institut für Bautechnik.

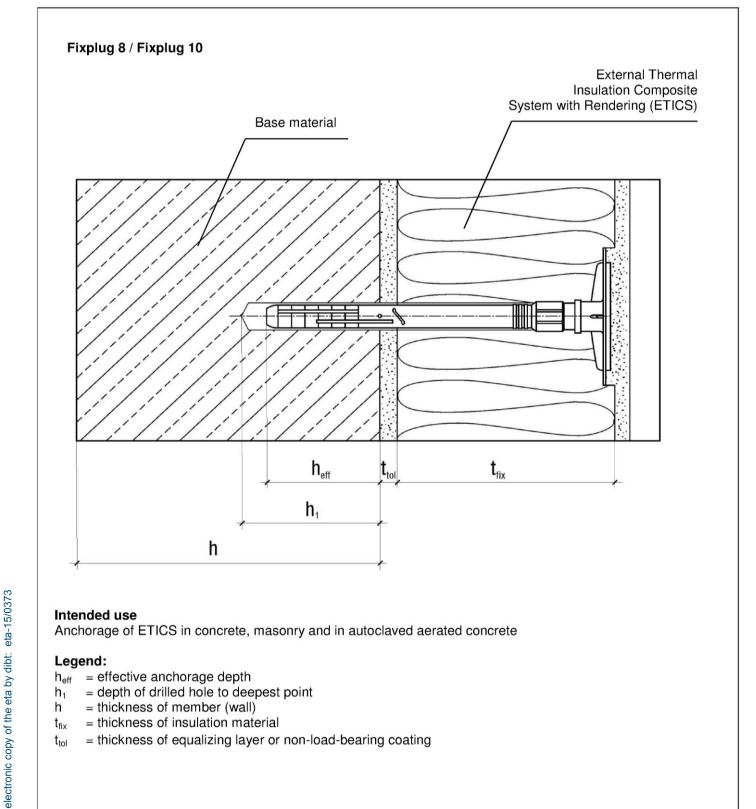

Issued in Berlin on 30 September 2016 by Deutsches Institut für Bautechnik

Andreas Kummerow p. p. Head of Department *beglaubigt:* Ziegler

#### Page 5 of European Technical Assessment ETA-15/0373 of 30 September 2016

English translation prepared by DIBt

### Intended use

Anchorage of ETICS in concrete, masonry and in autoclaved aerated concrete

## Legend:

- $h_{eff}$  = effective anchorage depth
- = depth of drilled hole to deepest point h<sub>1</sub>
- h = thickness of member (wall)
- = thickness of insulation material  $t_{\text{fix}}$
- = thickness of equalizing layer or non-load-bearing coating t<sub>tol</sub>

## **FIXPLUG 8 and FIXPLUG 10**

**Product description** Installed condition

Annex A 1

Table A1: Dimensions									
Anchor sleeve Nail									
Anchor type	d <sub>nom</sub> ±0,1	min $L_k \pm 0,2$	max L <sub>k</sub> ±0,2	D ±0,2	h <sub>eff</sub> (ABCDE)	d <sub>S</sub> ±0,1	min L <sub>s</sub> ±0,2	max L <sub>s</sub> ±0,2	
	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	
FIXPLUG 8	8	99	299	60	40	5,0	89	289	

Determination of maximum thickness of insulation  $t_{\text{fix}}$  for use category ABCDE:

$$t_{fix} = L_k - t_{tol} - h_{eff}$$
 (e.g.  $L_k = 150 \text{ mm}, t_{tol} = 10 \text{ mm}$ )

e.g.  $t_{fix} = 150 - 10 - 40$ 

 $t_{fix} = 100 \text{ mm}$ 

	Anchor sleeve							Nail		
Anchor type	d <sub>nom</sub> ±0,1	min L <sub>k</sub> ±0,2	max L <sub>k</sub> ±0,2	D ±0,2	h <sub>eff1</sub> (AB)	h <sub>eff2</sub> (CDE)	d <sub>s</sub> ±0,1	min L <sub>s</sub> ±0,2	max L <sub>s</sub> ±0,2	
	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	[mm]	
FIXPLUG 10	10	94	364	60	28,5	50	6,1	83	353	

Determination of maximum thickness of insulation  $t_{\text{fix}}$  for use category AB:

 $t_{fix} = L_k - t_{tol} - h_{eff}$  (e.g.  $L_k = 160 \text{ mm}, t_{tol} = 10 \text{ mm}$ )

e.g.  $t_{fix} = 160 - 10 - 28,5$ 

 $t_{fix} = 121,5 \text{ mm}$ 

Determination of maximum thickness of insulation  $t_{\text{\rm fix}}$  for use category CDE:

 $\begin{array}{l} t_{fix} = L_k \text{-} t_{tol} \text{-} h_{eff} \\ \text{e.g. } L_k = 160 \text{ mm}, \ t_{tol} = 10 \text{ mm}) \\ \text{e.g. } t_{fix} = 160 - 10 - 50 \\ t_{fix} = 100 \text{ mm} \end{array}$ 

## Table A2: Materials

Element	Material
Anchor sleeve	Polyethylene (natural)
Plastic nail	Polyamide + GF (natural or black)

## FIXPLUG 8 and FIXPLUG 10

**Product description** Dimensions, materials Annex A 3

## Specifications of intended use

#### Anchorages subject to:

• The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the thermal insulation composite system.

#### Base materials:

- Normal weight concrete (use category A) according to Annex C 1
- · Solid masonry (use category B), according to Annex C 1
- · Hollow or perforated masonry (use category C), according to Annex C 1
- · Lightweight aggregate concrete (use category D), according to Annex C 1
- Autoclaved aerated concrete (use category E), according to Annex C 1
- For other base materials of the use categories A, B, C, D or E the characteristic resistance of the anchor may be determined by job site tests according to ETAG 014 Edition February 2011, Annex D.

#### **Temperature Range:**

• 0°C to +40°C (max. short term temperature +40°C and max. long term temperature +24°C)

#### Design:

- The anchorages are designed in accordance with the ETAG 014 Edition February 2011 under the responsibility
  of an engineer experienced in anchorages and masonry work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings of thermal insulation composite systems.

#### Installation:

- Hole drilling by the drill modes according to Annex C 1
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person
  responsible for technical matters of the site
- Installation temperature from 0°C to +40°C
- Exposure to UV due to solar radiation of the anchor not protected by rendering ≤ 6 weeks

## FIXPLUG 8 and FIXPLUG 10

Intended use Specifications Annex B 1

#### Deutsches Institut für Bautechnik

## **Table B1: Installation parameters**

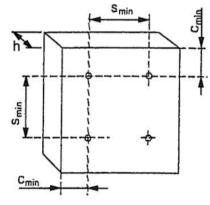

Anchor type		FIXPLUG 8
Drill hole diameter	d <sub>0</sub> [mm] =	8,0
Cutting diameter of drill bit	d <sub>cut</sub> [mm] ≤	8,45
Depth of drill hole to deepest point for category ABCDE	h₁ [mm] ≥	50
Effective anchorage depth in the base material category ABCDE	h <sub>eff</sub> [mm] ≥	40

Anchor type		FIXPLUG 10
Drill hole diameter	d <sub>0</sub> [mm] =	10,00
Cutting diameter of drill bit	d <sub>cut</sub> [mm] ≤	10,45
Depth of drill hole to deepest point for category AB	h₁ [mm] ≥	40
Effective anchorage depth in the base material (category AB)	h <sub>eff1</sub> [mm] ≥	28,5
Depth of drill hole to deepest point for category CDE	h₁ [mm] ≥	60
Effective anchorage depth in the base material (category CDE)	h <sub>eff2</sub> [mm] ≥	50

### Table B2: Minimum thickness of member, spacing and edge distance

Anchor type		FIXPLUG 8, 10
minimum thickness of member	h <sub>min</sub> = [mm]	100
minimum spacing	s <sub>min</sub> = [mm]	100
minimal edge distance	c <sub>min</sub> = [mm]	100

Scheme of spacing and edge distances
