

Approval body for construction products and types of construction

Bautechnisches Prüfamt

An institution established by the Federal and Laender Governments

European Technical Assessment

ETA-19/0091 of 17 April 2019

English translation prepared by DIBt - Original version in German language

General Part

Technical Assessment Body issuing the European Technical Assessment:

Trade name of the construction product

Product family to which the construction product belongs

Manufacturer

Manufacturing plant

This European Technical Assessment contains

This European Technical Assessment is issued in accordance with Regulation (EU) No 305/2011, on the basis of

Deutsches Institut für Bautechnik

"Perimeter- und Sockeldämmplatte 032 AW3 150",
"HIRSCH Therm 5 in 1 IR
Perimeterdämmung/Sockelplatte", "HIRSCH Therm
Perimaxx 15 IR Perimeterdämmung/Sockelplatte" and
"HIRSCH Therm Sockelplatte IR"

Expanded polystyrene (EPS) foam boards as thermal insulation outside the waterproofing

HIRSCH Porozell GmbH Augsburger Straße 8-10 33378 Rheda-Wiedenbrück DEUTSCHLAND

see Annex A

7 pages including 1 annex which form an integral part of this assessment

EAD 040773-00-1201

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

Specific Part

1 Technical description of the product

This European Technical Assessment applies to the thermal insulation boards of expanded polystyrene (EPS) with the designations:

"Perimeter- und Sockeldämmplatte 032 AW3 150", "HIRSCH Therm Sockelplatte IR",

"HIRSCH Therm 5 in 1 IR Perimeterdämmung/Sockelplatte" and

"HIRSCH Therm Perimaxx 15 IR Perimeterdämmung/Sockelplatte".

Depending on the product type the expanded polystyrene foam boards have the specifications according to table 1.

<u>Table 1</u> Designation and specification of the EPS-foam boards

Product type	Surface
"Perimeter- und Sockeldämmplatte 032 AW3 150", "HIRSCH Therm Sockelplatte IR" and "HIRSCH Therm Perimaxx 15 IR Perimeterdämmung/ Sockelplatte"	moulded (embossed) surface on both sides
"HIRSCH Therm 5 in 1 IR Perimeterdämmung/ Sockelplatte"	one moulded (embossed) side and one grooved side (rooved profile: square structure, depth = 5 mm)

From a nominal thickness of 200 mm the expanded polystyrene foam boards have a special edge treatment (shiplap, depth \geq 15 mm).

By a nominal thickness < 200 mm the expanded polystyrene foam boards can have a special edge treatment (shiplap, depth \geq 15 mm).

This European Technical Assessment applies to thermal insulation boards with a nominal thickness from 60 mm to 300 mm.

The expanded polystyrene foam boards do not contain Hexabromocyclododecane (HBCD).

The European Technical Assessment has been issued for the product on the basis of agreed data/information, deposited with Deutsches Institut für Bautechnik, which identifies the product that has been assessed. The European Technical Assessment applies only to products corresponding to this agreed data/information.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The expanded polystyrene foam boards are intended to be used as external horizontal and vertical thermal insulation of in-ground constructions outside the waterproofing (non-structural application) not constantly exposed to groundwater or to long-term backwater.

The performance according to section 3 only applies if the thermal insulation boards are installed according to the manufacture's installation instructions and if they are protected from precipitation, wetting or weathering during transport and storage before installation.

Concerning the application of the thermal insulation boards, also the respective national regulations shall be observed.

Where the thermal insulation boards are fixed by using adhesives, only such adhesions shall be used, which are suitable for this purpose. The assessment of these fixings is not subject of this European Technical Assessment.

Page 4 of 7 | 17 April 2019

English translation prepared by DIBt

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the expanded polystyrene foam boards of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

For sampling, conditioning and testing the provisions of the EAD No 040773-00-1201 apply.

3.1 Mechanical resistance and stability (BWR 1)

Not applicable

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class E
test acc. to EN ISO 11925-2:2010	acc. to EN 13501-1:2007 + A1:2009

3.3 Hygiene, health and environment (BWR 3)

Not applicable

3.4 Safet and accessibility in use (BWR 4)

Not applicable

3.5 Protection against noise (BWR 5)

Not applicable

3.6 Energy economy and heat retention (BWR 6)

Essential characteristic	Performance
Thermal conductivity at a reference temperature of 10 °C	Declared value:1
test acc. to EN 12667:2001 in accordance with EN 13163:2012+A1:2015	$\lambda_{\rm D} = 0.031 \text{ W/(m \cdot \text{K})}$
Mainting	No marfarmana accessed
Moisture conversion coefficient	No performance assessed
Water absorption	
long term water absorption by total immersion	
test acc. to EN 12087:2013 (method 2A)	≤ 3 Vol%
with deviating drip-off time of max. 10 seconds	
long term water absorption by diffusion	
test acc. to EN 12088:2013	≤ 5 Vol% (WD(V)5 acc. to EN 13163)

The declared value is representive for at least 90 % of the production with a confidence level of 90 % and applies to the density range mentioned in section 3.

Page 5 of 7 | 17 April 2019

English translation prepared by DIBt

Essential characteristic	Performance
Freeze-thaw resistance	
test acc. to EN 12091:2013	≤ 10 Vol%² (FTCD10 acc. to EN 13163)
Water vapour diffusion resistance factor	No performance assessed
Geometrical properties	tolerance
thickness	
test acc. to EN 823:2013	± 2 mm (T(2) acc. to EN 13163)
length, width	_
test acc. to EN 822:2013	± 0,6 % or ± 3 mm ³ (L(3) or. W(3) acc. to EN 13163)
equarances	(E(3) 01. W(3) acc. to EN 13103)
squareness on length and width	
test acc. to EN 824:2013	5 mm/m (S(5) acc. to EN 13163)
	, , ,
flatness	
test acc. to EN 825:2013	5 mm (P(5) acc. to EN 13163)
profiling and volume loss	_
	no performance assessed
Deformation under specified compressive load and temperature conditions	
test acc. to EN 1605:2013	
load: 40 kPa, temperature: (70 ± 1) °C	
time: (168 ± 1) h nominal thickness ≤ 200 mm:	< 5 % (DLT(2)5 acc. to EN 13163)
	≤ 5 % (DLT(2)5 acc. to EN 13163)
nominal thickness > 200 mm and ≤ 280 mm:	≤ 4 %
nominal thickness > 280 mm and ≤ 300 mm:	≤ 3 %
Dimensional stability under constant normal laboratory conditions	
test acc. to EN 1603:2013	DS(N)2 acc. to EN 13163
Dimensional stability under specified conditions	
test acc. to EN 1604:2013	DS(70,-)3 acc. to EN 13163
Tensile strength perpendicular to faces	No performance assessed
Bending strength	
test acc. to EN 12089:2013 (method B)	≥ 200 kPa
	(BS200 acc. to EN 13163)
Density	
test acc. to EN 1602:2013	27 kg/m³ to 30 kg/m³

The water absorption after freeze-thaw cycling shall not be increased by more than 10 Vol.-% and the reduction in compressive stress at 10 % deformation of the re-dried specimens, when tested in accordance with EN 826, shall not exceed 10 % of the initial value.

Whichever gives the biggest numerical tolerance

Page 6 of 7 | 17 April 2019

English translation prepared by DIBt

Essential characteristic	Performance
Compressive stress at 10 % deformation test acc. to EN 826:2013	≥ 150 kPa (CS(10)150 acc. to EN 13163)
Compressive creep	No performance assessed

3.7 Sustainable use of natural resources (BWR 7)

For the sustainable use of natural resources no peformance was investigated for this prodcut.

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with EAD No. 040773-00-1201, the applicable European legal act is: 1999/91/EC.

The system to be applied is:

System 3

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited with Deutsches Institut für Bautechnik.

Issued in Berlin on 17 April 2019 by Deutsches Institut für Bautechnik
