Laender Governments

## European Technical Assessment

**ETA-05/0161**  
**of 3 December 2021**

English translation prepared by DIBt - Original version in German language

### General Part

Technical Assessment Body issuing the  
European Technical Assessment:

Deutsches Institut für Bautechnik

Trade name of the construction product

MÜPRO Steel anchor

Product family  
to which the construction product belongs

Fastener for use in concrete for  
redundant non-structural systems

Manufacturer

MÜPRO Services GmbH  
Borsigstraße 14  
65205 Wiesbaden  
DEUTSCHLAND

Manufacturing plant

MÜPRO Werk 1, Deutschland

This European Technical Assessment  
contains

19 pages including 3 annexes which form an integral part  
of this assessment

This European Technical Assessment is  
issued in accordance with Regulation (EU)  
No 305/2011, on the basis of

EAD 330747-00-0601, Edition 06/2018

This version replaces

ETA-05/0161 issued on 7 April 2017

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

## Specific Part

### 1 Technical description of the product

The MÜPRO Steel anchor is a fastener made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod according to Annex A2.

The product description is given in Annex A.

### 2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	See Annex C5

#### 3.2 Safety in use (BWR 4)

Essential characteristic	Performance
Characteristic resistance for all load directions and modes of failure for simplified design	See Annex B3, C1 to C4
Durability	See Annex B1

### 4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with European Assessment Document EAD No. 330747-00-0601, the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

**5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document**

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited with Deutsches Institut für Bautechnik.

Issued in Berlin on xx Month 2021 by Deutsches Institut für Bautechnik

Dipl.-Ing. Beatrix Wittstock  
Head of Section

Baderschneider

## MÜPRO Steel anchor

Anchor sizes and variations					
Steel anchor ( <u>without</u> plunged boss)			Steel anchor ( <u>with</u> plunged boss)		
Anchorage depth $h_{ef} \geq 30$ mm (zinc plated, A4 or HCR)					
E M6x30			ES M6x30		
E M8x30			ES M8x30		
E M8x40			ES M8x40		
E M10x40			ES M10x30 (zinc plated)		
E M12x50			ES M10x40		
E M16x65			ES M12x50		
			ES M16x65		
Steel anchor ( <u>with</u> plunged boss)					
Anchorage depth $h_{ef} = 25$ mm (zinc plated)					
ES M6x25					
ES M8x25					
ES M10x25					
ES M12x25					

### Installation situation Steel anchor (with and without plunged boss) in concrete

### Installation situation Steel anchor (with plunged boss) in precast pre-stressed hollow core slabs for $h_{ef} = 25$ mm

$$w / e \leq 4,2$$

w = core width

e = web thickness

$d_b$  = flange thickness  $\geq 35$  mm (or  $\geq 30$  mm, see Annex C3)

$h_{ef}$  = anchorage depth

$t_{fix}$  = thickness of fixture

c = edge distance

## MÜPRO Steel anchor

### Product description

Anchor sizes and variations / Installation situations

## Annex A1

**Table A1: Materials**

Part	Designation	Steel, zinc plated	Stainless steel A4	High corrosion resistant steel HCR
1	Anchor sleeve	Cold formed or machining steel, galvanized, EN ISO 4042:2018	Stainless steel (e.g. 1.4401, 1.4404, 1.4571) EN 10088:2014, EN ISO 3506:2020	Stainless steel, 1.4529, 1.4565, EN 10088:2014, EN ISO 3506:2020
2	Cone	Cold formed or machining steel	Stainless steel (e.g. 1.4401, 1.4404, 1.4571) EN 10088:2014	

**Requirements on the fastening screw or the threaded rod and nut according to the engineering documents:**

- Minimum screw-in depth  $L_{smin}$  see Table B1 and B2
- The length of screw or the threaded rod shall be determined depending on the thickness of fixture  $t_{fix}$ , available thread length  $L_{th}$  (= maximum screw-in depth) and the minimum screw-in depth  $L_{smin}$ .
- $A_5 > 8$  % Ductility
- Materials
  - **Steel, zinc plated**, property class 4.6 / 4.8 / 5.6 / 5.8 or 8.8 according to EN ISO 898-1:2013 or EN ISO 898-2:2012
  - **Stainless steel A4** or **high corrosion resistant steel HCR**, property class 70 or 80 according to EN ISO 3506:2020

Precast pre-stressed hollow core slabs C30/37 to C50/60	✓			

### Use only for redundant, non-structural systems!

#### Base materials:

- Compacted, reinforced or unreinforced normal weight concrete (without fibers) acc. to EN 206:2013 + A1:2016

#### Use conditions:

- Structures subject to dry internal conditions (zinc plated steel, stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure (including industrial and marine environment) or exposure to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure and to permanently damp internal condition, if other particular aggressive conditions (high corrosion resistant steel)

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used.)

## MÜPRO Steel anchor

Intended use  
Specifications

Annex B1

## Specifications of intended use

### Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- The strength class and the length of the fastening screw or threaded rod shall be defined by the designing engineer
- Anchorages are designed acc. to EN 1992-4:2018 (if necessary in connection with TR 055, Edition February 2018)

### Installation:

- Anchor installation in accordance with the manufacturer's specifications and drawings and using the appropriate tools
- Drill hole by hammer drilling or vacuum drilling

**MÜPRO Steel anchor**

**Intended use**  
Installation parameters

**Annex B3**

Admissible anchor positions in precast pre-stressed hollow core slabs ( $w / e \leq 4,2$ )

- Core distance:  
 $l_c \geq 100 \text{ mm}$
- Pre-stressing steel distance:  
 $l_p \geq 100 \text{ mm}$
- Distance between anchor position and pre-stressing steel:  
 $a_p \geq 50 \text{ mm}$

Minimum spacing and edge distance of anchors and distance in precast pre-stressed hollow core slabs

- Minimum edge distance  
 $c_{min} \geq 150 \text{ mm}$
- Minimum spacing  
 $s_{min} \geq 200 \text{ mm}$

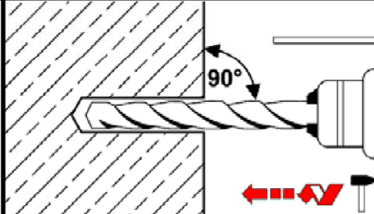

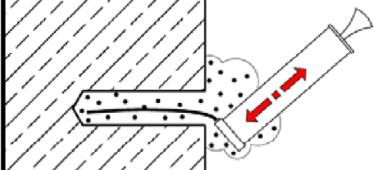

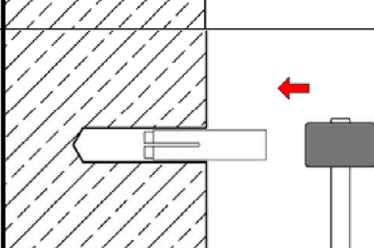

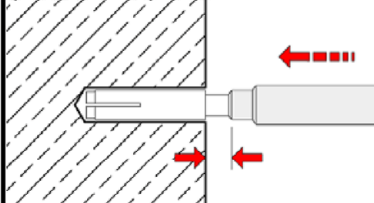

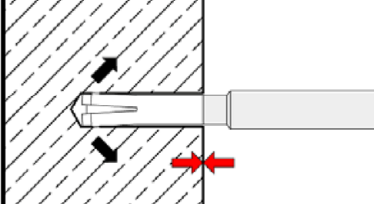

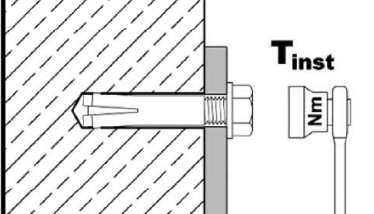

MÜPRO Steel anchor

Intended use  
Installation in precast pre-stressed hollow core slabs

Annex B4

## Installation instructions for solid concrete slabs

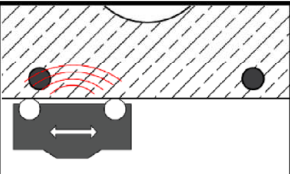

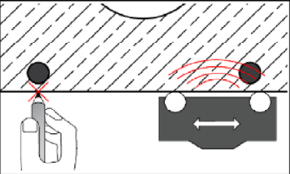

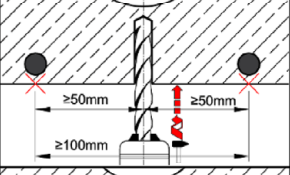

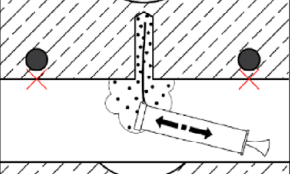

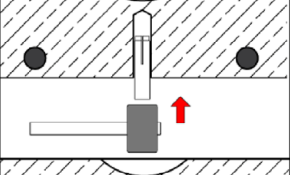

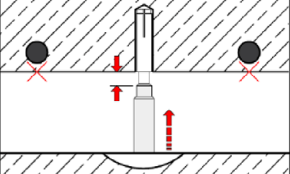

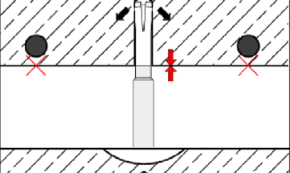

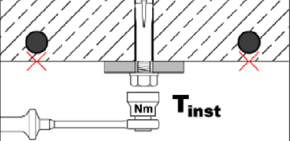

1		Drill hole perpendicular to concrete surface. Using vacuum drill bit proceed with step 3.
2		Blow out dust. Alternatively, vacuum clean down to the bottom of the hole.
3		Drive in anchor.
4		Drive in cone by using setting tool.
5		Shoulder of setting tool must fit on anchor rim.
6		Turn in screw or threaded rod with nut, observe minimum screw-in depth (see Annex B3). Apply installation torque $T_{inst}$ .

### MÜPRO Steel anchor

**Intended use**  
Installation instructions for solid concrete slabs

**Annex B5**

## Installation instructions for precast pre-stressed hollow core slabs

1		Search for the position of the reinforcement.
2		Mark the position of the pre-stressing steel and search for the other position of the pre-stressing steel.
3		Mark the positions of next pre-stressing steel.
4		Drill hole while maintaining the required distances.
5		Blow out dust. Alternatively vacuum clean down to the bottom of the hole.
6		Drive in anchor.
7		Drive in cone by using setting tool.
8		Shoulder of setting tool must fit on anchor rim.
9		Turn in screw or threaded rod with nut, observe the minimum screw-in depth (see Annex B3). Apply installation torque $T_{inst}$ .

## MÜPRO Steel anchor

### Performance

Characteristic values under **fire exposure** for  $h_{ef} \geq 30$  mm

## Annex C4

**Table C5:** Characteristic values under **fire exposure** in **solid concrete slabs**  
C20/25 to C50/60 for  $h_{ef} = 25 \text{ mm}$

Anchor size				M6x25	M8x25	M10x25	M12x25
Fire resistance class		Load in any direction					
Property class $\geq 4.6$	R 30	Characteristic resistance $F_{Rk,fi}^0$	[kN]	0,4	0,6	0,6	0,6
	R 60		[kN]	0,35	0,6	0,6	0,6
	R 90		[kN]	0,3	0,6	0,6	0,6
	R 120		[kN]	0,25	0,5	0,5	0,5
Partial factor		$\gamma_{M,fi}$	[-]	1,0			
Spacing		$s_{cr,fi}$	[mm]	100	100	100	100
R 30 – R 120		Edge distance	$c_{cr,fi}$ [mm]	50	50	50	50
If the fire attack is from more than one side, the edge distance shall be $\geq 300 \text{ mm}$ .
