ETA-18/0267 issued on 17 August 2020

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

European Technical Assessment

ETA-18/0267

English translation prepared by DIBt

Page 3 of 13 | 7 November 2022

Specific Part

1 Technical description of the product

The multilayer extruded polystyrene foam boards are manufactured from up to five layers of extruded polystyrene foam boards (single boards). The single boards with thicknesses of 60 mm to 80 mm are bonded together by full-surface thermal welding. The single boards are made of rigid cellular plastics material extruded from polystyrene or one of its copolymers and which have a closed cell structure. The blowing agent mixture is carbon dioxide (CO₂), isobutene and additives.

The multilayer extruded polystyrene foam boards have a foam skin on both surfaces and a special edge treatment (shiplap).

The multilayer extruded polystyrene foam boards do not contain Hexabromocyclododecane (HBCD).

The multilayer extruded polystyrene foam boards have the following designations:

- "Austrotherm XPS TOP 30 TB",
- "Austrotherm XPS TOP 50 TB" and
- "Austrotherm XPS TOP 70 TB"

The multilayer extruded polystyrene foam boards are manufactured with the following dimensions:

Nominal thicknesses:

"Austrotherm XPS TOP 30 TB"	140 mm to 340 mm
"Austrotherm XPS TOP 50 TB"	140 mm to 300 mm
"Austrotherm XPS TOP 70 TB"	140 mm to 300 mm

Nominal length: 1250 mm

Nominal widths: 600 mm

The European Technical Assessment has been issued for the product on the basis of agreed data/ information, deposited with Deutsches Institut für Bautechnik, which identifies the product that has been assessed. The European Technical Assessment applies only to products corresponding to this agreed data/information.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The extruded polystyrene foam boards are intended to be used as load bearing layer and /or thermal insulation outside the waterproofing. The boards are laid uniformly and even on the substrate to which they are applied. In particular the following applications are covered:

- Load bearing layer and thermal insulation underneath foundation slabs up to 300 mm thickness
- External horizontal and vertical thermal insulation of in-ground constructions in non-structural applications (also in case of groundwater)
- Inverted roof insulation (including park deck and green roof applications)

The performance according to section 3 only applies if the thermal insulation boards are installed according to the manufacturer's installation instructions and if they are protected from precipitation, wetting or weathering during transport and storage before installation.

Concerning the application of the thermal insulation boards, also the respective national regulations shall be observed.

Where the thermal insulation boards are fixed by using adhesives, only such adhesions shall be used, which are suitable for this purpose. The assessment of these fixings is not subject of this European Technical Assessment.

European Technical Assessment**ETA-18/0267**

English translation prepared by DIBt

Page 4 of 13 | 7 November 2022

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the extruded polystyrene foam boards of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

For sampling, conditioning and testing the provisions of the EAD No 040650-00-1201 "Extruded polystyrene foam boards as load bearing layer and / or thermal insulation outside the waterproofing" apply.

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Compressive stress at 10 % deformation or compressive strength test acc. to EN 826:2013 "Austrotherm XPS TOP 30 TB" "Austrotherm XPS TOP 50 TB" "Austrotherm XPS TOP 70 TB"	Level (individual values may fall below this level up to 10 %): ≥ 300 kPa ≥ 500 kPa ≥ 700 kPa
Slip deformation	No performance assessed
Compressive stress or compressive strength in the transverse and longitudinal directions	No performance assessed
Characteristic value of compressive stress or compressive strength 5%-fractile value for a one-sided confidence level of 75 % under unknown or known variance using ISO 12491:1997 "Austrotherm XPS TOP 30 TB" thickness $140 \text{ mm} \leq d \leq 300 \text{ mm}$ "Austrotherm XPS TOP 50 TB" thickness $140 \text{ mm} \leq d \leq 300 \text{ mm}$ "Austrotherm XPS TOP 70 TB" thickness $140 \text{ mm} < d \leq 300 \text{ mm}$	$\sigma_{0,05} = 317 \text{ kPa}$ ($n = 50$; $\sigma_{\text{mean}} = 356 \text{ kPa}$; $s_{\sigma} = 22 \text{ kPa}$) $\sigma_{0,05} = 502 \text{ kPa}$ ($n = 24$; $\sigma_{\text{mean}} = 544 \text{ kPa}$; $s_{\sigma} = 23 \text{ kPa}$) $\sigma_{0,05} = 703 \text{ kPa}$ ($n = 11$; $\sigma_{\text{mean}} = 746 \text{ kPa}$; $s_{\sigma} = 21 \text{ kPa}$)
Compressive creep	See Annex A

European Technical Assessment

ETA-18/0267

Page 5 of 13 | 7 November 2022

English translation prepared by DIBt

Essential characteristic	Performance
Behaviour under shear load (large-sized specimen) test acc. to the EAD and the guidelines in EN 12090:2013 "Austrotherm XPS TOP 30 TB", thickness 300 mm "Austrotherm XPS TOP 70 TB", thickness 300 mm	$\tau_{\text{large}} = 105 \text{ kPa}$ $\tau_{\text{large}} = 162 \text{ kPa}$
Creep under shear load	See Annex A
Creep under combined compressive and shear load	See Annex A
Compressive modulus of elasticity	No performance assessed
Adhesion behaviour under compressive and shear load on large-sized samples	No performance assessed
Shear strength test acc. to EN 12090:2013	$\geq 200 \text{ kPa}$
Density test acc. to EN 1602:2013 "Austrotherm XPS TOP 30 TB" "Austrotherm XPS TOP 50 TB" "Austrotherm XPS TOP 70 TB"	density range: $29 \text{ kg/m}^3 - 33 \text{ kg/m}^3$ $32 \text{ kg/m}^3 - 36 \text{ kg/m}^3$ $36 \text{ kg/m}^3 - 41 \text{ kg/m}^3$

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire test acc. to EN ISO 11925-2:2010	Class E acc. to EN 13501-1:2007 + A1:2009

3.3 Energy economy and heat retention (BWR 6)

Essential characteristic	Performance
Thermal conductivity at mean reference temperature of 10 °C test acc. to EN 12667:2001 or EN 12939:2001 and aging procedure acc. EN 13164:2012+A1:2015, Annex C with deviating storage time period (sliced specimen) of (90 +2/-2) days prior to testing "Austrotherm XPS TOP 30 TB" "Austrotherm XPS TOP 50 TB" "Austrotherm XPS TOP 70 TB"	$\lambda_{D(90d)} = 0.035 \text{ W/(m} \cdot \text{K)}$ $\lambda_{D(90d)} = 0.035 \text{ W/(m} \cdot \text{K)}$ $\lambda_{D(90d)} = 0.035 \text{ W/(m} \cdot \text{K)}$
Moisture conversion coefficient	No performance assessed

Page 8 of 13 | 7 November 2022

Essential characteristic	Performance
Volume percentage of closed cells test acc. to EN ISO 4590:2003 (method 1 with correction) "Austrotherm XPS TOP 30 TB", "Austrotherm XPS TOP 50 TB", "Austrotherm XPS TOP 70 TB"	≥ 95%

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with EAD No. 040650-00-1201, the applicable European legal acts are: 1995/467/EC and 1999/91/EC

The system to be applied is:

System 1 for Essential characteristics concerning Mechanical resistance and stability (BWR 1)

System 3 for all other Essential characteristics

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited with Deutsches Institut für Bautechnik.
