Approval body for construction products and types of construction

Bautechnisches Prüfamt

An institution established by the Federal and Laender Governments

Designated according to Article 29 of Regulation (EU) No 305/2011 and member of EOTA (European Organisation for Technical Assessment)

European Technical Assessment

ETA-20/0867 of 14 April 2022

English translation prepared by DIBt - Original version in German language

General Part

Technical Assessment Body issuing the European Technical Assessment:	Deutsches Institut für Bautechnik
Trade name of the construction product	Hilti concrete screw HUS4
Product family to which the construction product belongs	Mechanical fastener for use in concrete
Manufacturer	Hilti Aktiengesellschaft Feldkircherstrasse 100 9494 SCHAAN FÜRSTENTUM LIECHTENSTEIN
Manufacturing plant	Hilti Werke
This European Technical Assessment contains	29 pages including 3 annexes which form an integral part of this assessment
This European Technical Assessment is issued in accordance with Regulation (EU) No 305/2011, on the basis of	EAD 330232-01-0601, Edition 05/2021
This version replaces	ETA-20/0867 issued on 2 December 2021

Deutsches Institut für Bautechnik
Kolonnenstraße 30 B | 10829 Berlin | GERMANY | Phone: +49 30 78730-0 | Fax: +49 30 78730-320 | Email: dibt@dibt.de | www.dibt.de

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

Specific Part

1 Technical description of the product

The Hilti concrete screw HUS4 is an anchor in size 8, 10, 12, 14 and 16 mm made of galvanized steel. The anchor is screwed into a predrilled cylindrical drill hole. The special thread of the anchor cuts an internal thread into the member while setting. The anchorage is characterised by mechanical interlock in the special thread.

Product and product description are given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance to tension load (static and quasi-static loading)	See Annex B4 to B6, Annex C1 and C3
Characteristic resistance to shear load (static and quasi-static loading)	See Annex C2 and C4
Displacements (static and quasi-static loading)	See Annex C12 and C13
Characteristic resistance for seismic performance categories C1 and C2	See Annex C5 to C7

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	See Annex C8 to C11

3.3 Aspects of durability linked with the Basic Works Requirements

Essential characteristic	Performance
Durability	See Annex B1

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with European Assessment Document EAD No. 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at Deutsches Institut für Bautechnik.

Issued in Berlin on 14 April 2022 by Deutsches Institut für Bautechnik

Annex A4

Deutsches Institut für Bautechnik DIBt

Specifications of intended use

Anchorages subject to:

- Static and quasi-static loadings
- Seismic action for performance category C1 and C2
- Fire exposure

Base materials:

- Compacted reinforced or unreinforced normal weight concrete without fibres according to EN 206:2013 +A1:2016.
- Strength classes C20/25 to C50/60 according to EN 206-1:2010+A1:2016.
- Cracked and uncracked concrete.

Use conditions (Environmental conditions):

- Anchorages subject to dry internal conditions.

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the fastener is indicated on the design drawings (e. g. position of the fastener relative to reinforcement or to supports, etc.).
- Anchorages are designed in accordance with:
  EN 1992-4:2018 and EOTA Technical Report TR 055 edition February 2018.
- In case of requirements to resistance to fire local spalling of the concrete cover must be avoided.

Installation:

- Fastener installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on site.
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of the aborted hole or smaller distance if the aborted hole is filled with high strength mortar and if under shear or oblique tension load it is not the direction of the load application.
- After installation further turning of the fastener must not be possible.
- The head of the fastener (HUS4-H and HUS4-C) must be supported on the fixture and is not damaged.
- Hilti filling set is suitable for HUS4-H and HUS4-A

Installation instructions

Hole drilling and cleaning

Hammer drilling (HD) all sizes (size 16 with cleaning only)	
	Mark drilling depth h_1 for pre or through installation. Details for drilling depth h_1 see table B5 to B7.
	Cleaning needed in downward and horizontal installation direction with drill hole depth. $h_1 = h_{nom} + 10$ mm
	No cleaning is allowed in upward installation direction. No cleaning is allowed in downward and horizontal installation direction when 3x ventilation[1)] after drilling is executed. Drill hole depth $h_1 = h_{nom} + 10$ mm$+ 2 * d_0$ [1)] moving the drill bit in and out of the drill hole 3 times after the recommended drilling depth h_1 is achieved. This procedure shall be done with both revolution and hammer functions activated in the drilling machine. For more details read the relevant MPII.
Hammer drilling with Hilti hollow drill bit (HDB) TE-CD size 12 and 14.	
	No cleaning needed. $h_1 = h_{nom} + 10$ mm
Diamond coring with DD-EC1 or DD-30W size 10 to 14	
	Cleaning needed in all installation directions. $h_1 = h_{nom} + 10$ mm

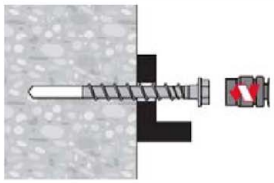
Deutsches Institut für Bautechnik DIBt

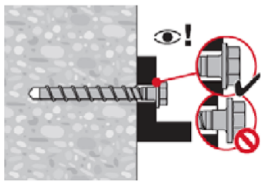
Fastener setting without adjustment

Setting by impact screw driver



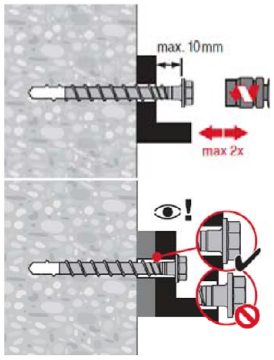
Setting parameters listed in Table B5 to B7.

Setting check



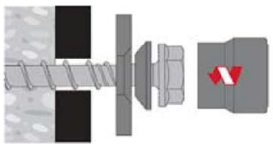
Fastener setting with adjustment

Adjusting process

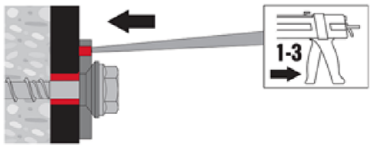


A screw can be adjusted maximum two times. The total allowed thickness of shims added during the adjustment process is 10 mm. The final embedment depth after adjustment process must be larger or equal than h_{nom2} or h_{nom3}.

Fastener setting with Hilti filling set



Injection of Hilti HIT mortar and curing time



Fill the annular gap between screw and fixture with 1-3 strokes of a Hilti injection mortar HIT-HY … or HIT-RE … .
Follow the installation instructions supplied with the respective Hilti injection mortar.
After required curing time t_{cure} the fastening can be loaded.

Hilti screw anchor HUS4	**Annex B8**

Table C10: Displacements under tension and shear loads for seismic category 2

Fastener size HUS4			**8** h_{nom3}	**10** h_{nom3}	**12** h_{nom3}	14 h_{nom3}
Nominal embedment depth	h_{nom}	[mm]	70	85	100	115
Tension load						
Displacement DLS	$\delta_{N,C2\ (DLS)}$	[mm]	0,59	0,80	0,77	1,06
Displacement ULS	$\delta_{N,C2\ (ULS)}$	[mm]	1,36	3,66	2,78	3,89
Shear load with Hilti filling set (HUS4-H and HUS4-A)						
Displacement DLS	$\delta_{V,C2\ (DLS)}$	[mm]	1,85	1,72	1,73	2,52
Displacement ULS	$\delta_{V,C2\ (ULS)}$	[mm]	5,44	6,88	5,62	6,79
Shear load without Hilti filling set						
Displacement DLS	$\delta_{V,C2\ (DLS)}$	[mm]	4,64	5,02	4,90	4,93
Displacement ULS	$\delta_{V,C2\ (ULS)}$	[mm]	7,96	8,97	7,00	9,14

Hilti screw anchor HUS4	**Annex C13**
Performances Displacement values in case of seismic C2 loading
